Abstract

The work aims to present extensions of the developed methods used in electrostatic analysis of planar periodic and finite systems for efficient solving of variety of the acoustic and electromagnetic wave generation and scattering problems. Specifically, their generalization for application in the acoustic beam-forming analysis is reported. Moreover, certain electromagnetic wave scattering problems by periodic waveguiding structures which can be efficiently approached by these methods are also considered.

Abstrakt

Podstawowym celem pracy jest przedstawienie opracowanych uogólnionych metod analizy zagadnień elektrostatyki układów planarnych zarówno periodycznych jak i nieperiodycznych, zawierających skończoną ilość elementów, do celów efektywnego rozwiązywania zagadnień brzegowych w teorii generacji i detekcji fal akustycznych oraz analizy zagadnień brzegowych w teorii fal elektromagnetycznych dla przypadku struktur falowodowych.

Symbols and abbreviations (optional)

The short list of most frequently used symbols and abbreviations is provided below:

ω, Ω	– angular frequency
f	– temporal frequency
f_0	– central frequency (of a transducer)
λ	– wave-length
k	– wave-number
Λ	– period of strips (group of strips) or baffles (group of baffles)
K	– spatial spectrum wave-number of periodic array of strips (baffles)
P_k	– Legendre polynomials of the first kind
J_k	– Bessel function of the first kind of order k
Γ	– gamma function
ϕ	– electrostatic or acoustic potential
Q	– electrostatic charge
V	– potential difference (voltage between strips)
σ	– surface charge distribution
x, y, z	– Cartesian space variables
ϵ_0	– dielectric permittivity of vacuum
ϵ	– effective surface dielectric permittivity
μ_0	– magnetic permeability of vacuum
E	– electric field vector
H	– magnetic field vector
D	– electric induction vector
E_i	– components of electric field, $i = x, y, z$

H_i	– components of magnetic field, $i = x, y, z$
D_i	– components of electric induction, $i = x, y, z$
$G(\xi)$	– planar harmonic Green's function
$\Phi(\xi)$	– spectrum representation of the complex (electrostatic) field function
$\Phi(x)$	– spatial representation of the complex (electrostatic) field function
d	– strip half-width
r, s	– spectral variables related to the x, y spatial coordinates constrained to one Brillouin zone
\mathcal{F}	– Fourier transform
p	– acoustic pressure
ρ_a	– mass density of the acoustic media
v_z	– z -component (normal component) of the particle velocity
Π	– acoustic power
Π_z	– normal component of the acoustic Poynting vector
SAW	– surface acoustic wave
IDT	– interdigital transducer
BIS	– Blotekjær, Ingebrigtsen, and Skeie expansion method
FFT	– fast (finite) Fourier transform
SNR	– signal-to-noise ratio
SA	– synthetic aperture
SAFT	– synthetic aperture focusing technique
M-SAFT	– multi-element synthetic aperture focusing technique
STA	– synthetic transmit aperture
MSTA	– multi-element synthetic transmit aperture
TM	– transverse magnetic wave polarization
TE	– transverse electric wave polarization

Introduction

1.1 Title of the Section 1.1

A manuscript submitted for publication to IPPT Reports on Fundamental Technological Research should be original work which have not been previously published and should not be under consideration for publication elsewhere. Submitted materials should be written in good English. Exceptionally, submissions of the PhD and Habilitation theses written in the language other than English are also possible, provided that they are accompanied by parallel submissions of their summaries written in good English.

The summaries should be prepared in the form of research or communication articles suitable for publication in regular journal issues. Manuscripts in an electronic format should be submitted by e-mail on the address `reports@ippt.gov.pl`, together with their pdf copies for peer-review processes. The Authors also have to deliver the entire manuscript (text and the figures) in pdf file format on CD-ROM to the Editorial Office of the IPPT Reports on Fundamental Technological Research, personally or send by mail at the address:

Editorial Office of the IPPT Reports on Fundamental Technological Research
IPPT-PAN, 5b Pawinskiego Str., 02-106 Warsaw, Poland

Notification of the Editor's decision and requests for revision are also sent by e-mail.

1.1.1 Title of the Subsection 1.1.1

To be able to use required font the Author's are encouraged to use the \LaTeX which enables using unicode fonts. This template is a guideline preparation of the manuscript for printed version. The paper format is B5 and the text font for main body of the manuscript is Times New Roman 11 pt. The printing area is 13.2 cm x 19.2 cm. The manuscript should be prepared in single-column format. Body paragraphs should be unindented and have 6pt spacing in between. The margins should be 1.75 cm on each side of the paper (top, bottom, left, and

right sides). The chapters start on odd pages (provided the previous chapter finishes on odd page the next page should be empty).

Title of the Subsubsection (without number)

To simplify the manuscript preparation the 'IPPT Reports' T_EXtemplate should be used.

Title of the Chapter 2

2.1 Title of the Section 2.1

Math equations should be centered and equation numbers including chapter numbers should be placed in brackets and set flush right:

$$y = ax + b. \quad (2.1)$$

Equations should be referenced either as Eq. (2.1) or simply as (2.1). Once chosen the reference style should be followed throughout the manuscript.

2.2 Title of the Section 2.2

Figure caption should be in Times New Roman size 10 and placed under the figure. If caption fits on one line it should be centered, otherwise it should be justified as the body text. Figure numbers should include chapter numbers as well. The preferred image file format for T_EXdocument is eps with resolution 300 dpi at least. In manuscripts figures should be referenced as Figure 2.1, consequently the subfigures should be referenced as Figure 2.1(a).

Figure 2.1. Example of the figure caption (a) subfigure 1 and (b) subfigure 2.

2.3 Title of the Section 2.3

Table caption should be also in Times New Roman size 10 and placed above the table. If caption fits on one line it should be centered, otherwise it should be justified as the body text. Table numbers should also include chapter numbers.

Table 2.1. Specification for IPPT Reports on Fundamental Technological Research.

PAPER SIZE	B5 (18.2 CM X 25.7 CM), PRINTING AREA: 13.2 CM X 19.6 CM				
Margins	Top 2.7 cm, Bottom 3.4 cm, Left 2.5 cm, Right 2.5 cm				
Typography	Font Name	Font Size (pts.)	Spacing (pts) before/after	Alignment	Notes
Title	Calibri	22		Left	All Caps
Sub-title	Calibri	20		Left	
Authors	Calibri	20		Left	
Chapter	Calibri	22	36/36	Left	
Section	Calibri	16	18/12	Left	
Sub-section	Calibri	12	18/12	Left	
Sub-subsection	Calibri	12	18/12	Left	
Paragraph	Times New Roman	11	0/0	Justified	
Table Caption	Times New Roman	10		Centered/Justified	Above table, centered if fits single line
Figure Caption	Times New Roman	10		Centered/Justified	Below Figure, centered if fits single line
Equation	Cambria Math	11		Center	Equation number flush right
References	Times New Roman	11	0/3	Justified	

2.4 Title of the Section 2.4

The literature should be cited as follows: for single item [1], for several successive items [1–3], or for several items randomly selected [1, 3–5]. The authors should strictly follow the reference style given below in this template. The references should be sorted according to the order of appearance in the text.

A

Title of the Appendix A

Appendices should be numbered with capital letters.

B

Title of the Appendix B

The Authors are encouraged to prepare their manuscript using Office 2010 software for better quality. This template is a guideline preparation of the manuscript for printed version. The paper format is B5 and the text font for main body of the manuscript is Times New Roman 11pt. The printing area is 13.2 cm x 19.2 cm. The margins should be 1.75 cm on each side of the paper (top, bottom, left, and right sides). The chapters start on odd pages (provided the previous chapter finishes on odd page the next page should be empty).
